Summary

Web Developer with 10+ years of experience building and maintaining WordPress websites using HTML, CSS, JavaScript, PHP, and responsive design principles. Experienced collaborating with marketing and design teams while developing custom page layouts, improving website performance, accessibility, and SEO. Recently expanded technical skillset through a Full Stack Developer Bootcamp with a focus on React, Node.js, Express, MongoDB, GraphQL, and Git. Seeking a Front-End or Full-Stack Web Developer position where I can build modern, user-focused web applications and continue expanding my full-stack development expertise.

Skills

Languages: HTML5, CSS3, JavaScript (ES6+), PHP

Front-End: React, Bootstrap, jQuery, Responsive Design

Back-End: Node.js, Express, REST APIs, GraphQL

Database: MongoDB, MySQL

CMS: WordPress, Elementor, WooCommerce

Tools: Git, GitHub, VS Code, Google Analytics, Google Ads

Professional Experience

Web Developer – Entertainment Cruise Productions

01/24 – 06/24 | Clayton, MO

- Managed and enhanced 6+ WordPress sites, implementing front-end improvements, custom page layouts, and ongoing maintenance that improved usability and supported marketing initiatives.
- Improved accessibility and usability across sites by refining structure, navigation, and page elements to support cleaner user experience.
- Implemented front-end changes using HTML, CSS, JavaScript, and PHP within WordPress to support site updates and page builds.

- Collaborated with a four-person marketing team to launch seasonal campaigns across six websites
- Identified issues with usability, SEO, and performance and resolved through ongoing testing and optimization.

Web Developer/Graphic Designer – Natoli Engineering

05/23 – 08/23 | St. Charles, MO

- Built and updated web pages using HTML, CSS, and JavaScript, supporting responsive and user-friendly page delivery.
- Created responsive layouts and adjusted existing pages to improve usability across web pages and device types.
- Integrated content from internal systems into responsive web pages, improving content accuracy and reducing manual updates
- Collaborated with cross-functional teams to deliver website improvements supporting company branding and digital marketing initiatives

Web Development Specialist – St. Andrew's Resources for Seniors System

02/19 – 03/23 | St. Louis, MO

- Maintained and improved at least ten websites using WordPress and custom HTML/CSS, supporting ongoing content and page updates over time.
- Developed over 40 landing pages to support digital marketing campaigns
- Used Google Analytics and Google Ads to support marketing efforts and track site performance for campaign-related web work.
- Produced supporting assets including PDFs, graphics, and videos for campaigns and communities
- Helped improve SEO through content updates, page structure, and keyword alignment
- Worked closely with marketing to support campaigns through web updates and landing pages

WordPress Developer – The Miller Group

02/18 – 01/19 | Des Peres, MO

- Built and customized WordPress websites for client projects
- Modified themes and layouts to match design requirements
- Maintained sites post-launch, handling updates and client requests
- Communicated directly with clients to gather feedback and implement changes

Graphic Designer/Sign Maker – Topaz SIGNWorks

01/17 – 02/18 | St. Charles, MO

- Designed signage and print materials using Illustrator and Photoshop
- Prepared files for production and coordinated approvals with clients
- Supported printing and installation processes for large-format work

Designer/Developer – Mascot Agency

06/13 – 10/16 | St. Louis, MO

- Contributed to website updates, branding work, and marketing materials for client projects
- Designed and updated websites for startups, law firms, and small businesses
- Worked with a team to deliver both digital and print assets
